OUR REPRESENTATIVES.

Messrs: Editors: As it seems to be the order of the day for everyone to public interest, I thought I would give you mine as to our representatives. It is a well-known fact that the longer a man sticks to his trade the more competent he becomes to turn out good work so I think it is with our law-makers. As we have in our county a delegation who are well divided as to occupation and section of the county, I hope the clubs will endorse and the people support them for another term, and charge their duties as acceptably to the people in the future as they have done in the past. While I am in hearty sympathy with the farmers' movement, I do not wish to proscribe anyone on account of their occupation, tion or the Democratic primary. I think we ought to have one lawyer in each delegation, and as we have a young, intelligent, energetic lawyer in our delegation, who, if he continues as he has begun, will be an honor to our county, and a thorough representative of her people. I move that we elect him again. FLAT BRANCH.

LIVE AND LEARN.

Messrs. Editors: To say that we have had more rain since the 20th May up to the present date than was ever known in the same length of time, would be repeating what you have already heard for the dozenth time, still it ought to be put on record. A neighbor told me that a large branch which runs through his place has been out of its banks sixteen times, and Little Rocky Creek has been out of its banks eighteen times and has been 2nd Vice-President-J. Barkley fuller than at any time since 1856, when so many mill dams were broken. A large per cent. of the bottoms are completely drowned out. Messrs. Editors, my main object in writing is not to chronicle the above facts, but to thank your correspondent "Old Man", for his explanation of cheat or chess in wheat. I have been reproaching myself for a thing I thought was a fault of mine, but now I feel wonderfully relieved. To explain: I have a field lying along the public road and planted cotton in it, and very much to my disappointed and chagrin, the land being wet and sponty, the cotton the 10th day of August, 1886, at which time will be held a reference in said cause.
